## **ATM Recognized on *The Zweig Letter* Hot Firm List for 2007**

GAINESVILLE, FL — Management consulting and research firm Zweig White Information Services has identified Applied Technology & Management among the 200 fastest-growing U.S. architecture, engineering, and environmental consulting firms for its annual ranking, *The Zweig Letter* Hot Firm List. This annual list features the design and environmental firms that have

outperformed the economy and competitors to become industry leaders.

ATM and this year's other Hot Firms were recognized at a special reception at *The Zweig Letter* Hot Firm Celebration & Conference, held last week in Boston.

Mark Zweig, founder and director of ZweigWhite, says, "The firms that made this year's Hot Firm List should be proud...Firms that commit to revenue growth while investing in marketing, information technology, and other infrastructure are usually the most successful in our industry. They have shown they have the ability to sustain their success, year after year. The hottest firms in the business—those with consistent growth and success at outperforming the economy and their peers—are the ones that attract top staff and the best clients."

ATM President and CEO Tom Schanze, P.E., says the award is reflective of ATM. "Year after year we continue on an upward growth curve, serving more clients and ever-larger projects, expanding beyond the Eastern Seaboard and the Caribbean to the Middle East, Europe, and China.

"Clients can be assured that we're here to serve them better than ever, and job seekers know they have a solid place to grow with ATM."

Details about the award can be found at [www.zweigwhite.com/news/item.asp?prID=333](http://www.zweigwhite.com/news/item.asp?prID=333).

### **About ATM**
