FOR IMMEDIATE RELEASE

1 June 2009

ATM Welcomes a New President

Long-Time Marine Division Director to Lead Company

Gainesville, FL- Applied Technology and Management, Inc. (ATM) welcomes a new president. W. Samuel Phlegar, P.E., has accepted the position of President of Applied Technology and Management, Inc., a 25 year old environmental consulting firm with offices across the Southeast and Dubai. Phlegar, a 20-year veteran of the firm, brings considerable management and technical experience to the new role. He has most recently focused on marine related projects across the globe and now welcomes the opportunity to lead the firm. Mr. Phlegar has excelled in many areas including engineering, business strategy, and the successful building of a coastal and marine engineering practice that is globally recognized.

Phlegar received his Bachelor's degree in Civil Engineering from Clemson University and his Master's degree in Coastal and Oceanographic Engineering from the University of Florida. He is a Professional Engineer in the states of South Carolina, North Carolina, Delaware, and internationally in the Bahamas.

"It is certainly challenging taking the helm at this time given the economic issues facing our industry. I am convinced that ATM will not only survive, but flourish as we see the U.S. and global economies recover. Our staff at ATM is what makes us special and I am proud to lead such a great group of professionals."

About ATM:

ATM (www.appliedtm.com) provides coastal, environmental, marine, and water resources engineering services to public and private clients worldwide.
