

# Cutuco Energy Central America

## La Union, El Salvador

### Services Rendered

- Environmental Consulting
- Dredged Materials Management
- Tier I Sediment and Analysis Plan

### Project Summary

ATM provided environmental consulting services for the evaluation of potential effects of dredge material and made recommendations for disposal at Port of La Union, El Salvador.

Determination of the sediment quality and containment levels in dredge materials was necessary to demonstrate compliance with applicable requirements and to recommend dredged material management procedures. ATM completed a Tier I Preliminary Sediment Quality Evaluation and developed a Sampling Analysis Plan.

Future work is to include a Tier II Sediment Quality Sampling and Analysis and Tier II Dredge Material Environmental Effects Evaluation.
